

QUALITY POLICY

Softneta specializes in medical imaging, communication systems and provides comprehensive service in order to improve health care and reduce cost of patient care. The organization ensures that the customer will receive quality systems and services which meet his needs and Softneta commitments.

We appreciate the inner motivation to achieve general goals and we respectfully educate our employees providing the necessary working material. Softneta always reviews the quality of work constantly improving management of the organization and working methods and strives to create a democratic working environment throughout the whole process. In addition to this, long-term relationships with customers, suppliers and partners is one of the main reasons why we can proceed with honorable activity. As a result, quality management system has been developed and implemented conforming to ISO 13485 standards. The main goal is to take care of its effectiveness, ensure compliance with legal and other requirements.

We are flexible due to the context of constantly changing environment always evaluating the achievements while reviewing policies and objectives. Our goal is to ensure workers' participation in management system process, informing them about the organization's intentions and each employee's contribution to the development of socially responsible environment and providing quality services to customers, ensuring satisfaction of interested parties.

We aim to become a global medical imaging and communication organization which implement planned, measured, targeted and resourced business development.
